It Monday Next. Monday the Union P will be again running ten hours a day much to the lov of the workmen. Last April the time was cut down to eight hours with a corresponding decrease of wages. FIGHTING FOR AVENUE.

The Street Railway Companies' Desire for Military Road. This morning the board of public works will again consider the question of granting right of way to the Omaha Street Railway company on Lowe avenue to Hamilton and thence along the Military road. This route, it seems, has been pre-empted by the motor people and a contest may be ex

Not long since the property ownes on Mititary avenue commenced to agitate the question of inducing the Motor company to extend its service out the avenue. The latter required a bonus of eighty acres, the creeting of the poles and the tranfer of the rails, which were laid for the Benson motor.

It is understood that the required amount of land for the bonus has been secured; that the full amount of money sought has not yet been raised, but the balance has been guar-anteed with the hope of eventually being paid up by parties who are interested in the property along the line; and that the motor properly along the me; and that the moore people have accepted the property and their conditions and promised to extend their line as desired. They have also promised that the fare to and from the city shall not be more than 5 cents.

When the street railway company asked for permission to build on the avenue, a resi-dent on the latter showed the board of pubthe works a letter declining a request to ex-tend their tracks in that direction, on the ground that the motor company had already got into the territory.

This brought several of the street railway

This brought several of the street railway men to their feet with protestations that their request was a bona fide one, and that they intended, if granted the right to lay their tracks, to do so on the streets mentioned at the earliest possible moment. As intimated, the question will be again opened at the meeting to-day.

Un Goes the Wire.

The Omaha Street Railway company comnenced stringing the overhead wires for their electric motors yesterday. The line started at Hanscom Park and will extend north on Park avenue to Leavenworth street, east to Sixteenth, north to Cuming, west to Twenty fourth and north on Twenty-fourth street to the Belt line railway, a distance of five and one-half miles. Ten trail cars have been received and some oo the motor cars have been shipped. The Sprague Electric company is under contract to furnish the motors by the 15th of Scotember with by the 15th of September Will a forfeit of \$100 per day for each day after

The system to be used differs from the one in use by the motor railway company. The trolley wire is fed by a heavy wire strung on the poles, with feed wires connecting the two at intervals of about a block.

The company expects to have this line in operation about the last of this month, and it everything proves satisfactory the Six cent and Eighteenth street line will be oushed ahead, and efforts made to get it in operation

The cars which have been received for the Park avenue and Twenty-fourth street line are handsomely painted with a cream colored body. The seats are handsomely upholstered and all the appointments are elegant.
